Researchers in the U. S. are waiting with bated breath for the 2012 release of the 1940 census -- like a child on Christmas Eve, the morning cannot come soon enough.

[Watch the opening event live webcast](#) (April 2, 8:30 A.M. EDT)

While the original intent of the census was to determine how many representatives each state was entitled to send to the U.S. Congress, it has become a vital tool for Federal agencies in determining allocation of Federal funds and resources. The census is also a key research tool for sociologists, demographers, historians, political scientists and genealogists.

Questions on the 1940 Census include standard ones such as: name, age, gender, race, education, and place of birth. It also asks new questions, reflecting concerns of the Great Depression. The instructions ask the enumerator to enter an X after the name of the person furnishing the information about the family; to note whether the person worked for the CCC, WPA, or NYA the week of March 24-30, 1940; and to list where they lived on April 1, 1935.
